

SANITISATION PROTOCOLS

SANITISATION – HANDS, NETBALL POSTS AND OTHER EQUIPMENT

- Hands must be sanitised upon arrival of netball activity and must be sanitised as departing the netball match.
- Breaks should be scheduled at least every 15 minutes to allow for hands to be sanitised in both netball training and netball activity.
- Netball posts should be sanitised before and after activity
- If a player or official makes contact with the netball post, it should be sanitised
- Players should use their own netball wherever possible, this should be sanitised before use
- Any personal items such as water bottles should be clearly marked/personally identifiable without the need to pick up. Water bottles should never be shared
- If the club, team or leagues are providing the netball for training or matches; it should be made clear which are 'clean' balls and which are used. This could be done via clearly labelling bags/containers
- In games/practices within training sessions or matches, sharing of whistles is not permitted

NETBALL SANITISATION

Netballs can now be shared. This should however be minimised and where possible players should use their own netball. Where netballs are shared for example in game play, the following must happen:

- Netballs must be sanitised prior to each netball session or match
- At a minimum of every 15 minutes, the netball must be sanitised using the following 4 steps:
 - Sanitise hands
 - Wipe the netball using an antibacterial wipe
 - Dispose of the wipe in the bin
 - Sanitise hands
- For matches a spare 'clean' netball should be available
- Please avoid touching balls which come on to your court from another court

BIB SANITISATION

- Bibs should not be shared. MMNL will be providing 'Foggers' to sanitise your bibs
- Bibs should be washed at 60 degrees after each match
